

Ledon and SchahlLED Lighting announce distribution agreement for LED Modules

- **SchahlLED becomes an official distributor of innovative LED modules from Ledon**

Ledon Lighting Jennersdorf GmbH, a company of the Zumtobel Group, and SchahlLED Lighting, a member of the L&O Group, have signed an agreement whereby SchahlLED is an official distributor of LED modules from Ledon. The LED modules, from the "XED" product range by Ledon, are specifically designed for application as the LED lightsource for LED retrofit bulbs.

SchahlLED Lighting will distribute the XED module portfolio via its sister companies in Europe, as well as Professional Lamps & Optics Hong Kong/Shenzhen in Asia and Professional Lamps Inc. in the Americas. In this way the L&O Group can secure local supply and support. SchahlLED and the whole L&O Group are confident in becoming successful with the XED modules, which demonstrate highest lumen efficacy (up to 90 lm/W at 2900K), best color rendering (CRI up to 90), extremely low thermal resistance and long lifetime – and can be rated as the best performance modules for LED retrofit bulb on the market today.

"Our superior LED modules provide an excellent opportunity for everybody to actively contribute to energy saving" says Dr Stefan Tasch, CEO Ledon Lighting Jennersdorf. "We are very happy to cooperate with SchahlLED Lighting, a member of the L&O Group. We are in a position to offer our market leading XED modules to support bulb manufacturers, increasing access to key markets and, with local support, realising highest customer satisfaction."

According to Erich Obermeier, Managing Director of SchahlLED Lighting, "This cooperation is a real win-win solution for both companies. The LED and Lighting competence of SchahlLED plus its worldwide operating sister companies of the L&O group, combined with the market leading XED modules of Ledon allows the necessary acceleration in the adoption of superior LED retrofit bulbs."
